Sir/Madam:

To comply with 37 CFR §§1.97 and 1.98, Applicant submits the enclosed Form PTO/SB/08a, as well as a copy of the each cited reference.

In accordance with MPEP §§609 and 707.05(b), Applicant requests that the cited references be given thorough consideration, and that the Examiner make the references of record by initialing the modified Form 1449 next to each citation. Applicant requests such initialing even if the Examiner does not consider: (1) the cited information to be sufficiently pertinent to use in a rejection, or (2) the guidelines for a citation to have been fully satisfied. Applicant makes this request so that the references will be cited on the face of a patent issuing from this patent application.

Applicant submits this statement in accordance with the duty to disclose information material to patentability under 37 CFR §1.56. Applicant, however, is not admitting that the references are necessarily relevant or prior art. In addition, Applicant is not representing that the cited references represent the results from a complete search. Applicant anticipates that the Examiner, in the normal course of examination, will make an independent search consistent with 37 CFR §1.104, and, in the course of such search, will review for relevance the cited information, even if not initialed.

The cited references are English translations of Chinese Patent Appl. Nos. 97103659.4
